**Records of Historic Flooding:**

- River
- Sea
- Sewer
- Surface Water
- Unknown

- EA historic flood extents
- Medway administrative boundary

*These historic flood records are a combination of data from remote sensing, ground surveys and staff observations provided by Medway Council and the Environment Agency. Validated third party data and anecdotal evidence are also included. The datasets used may have been designed to be viewed at a range of map scales, and therefore this map is not intended to be viewed at a site-specific scale. These records are the best available at the time of collation, but should not be considered comprehensive. An area without a flood outline does not necessarily imply that there is no risk of flooding. Queries with regard to the recorded flood extents should be directed to the Environment Agency.*

ID	Type of Flooding	Date Flooded	Description of Flooding
1	Surface Water	01/08/2017	Road flooding due to capacity issues. Two new gullies have been installed to stop ponding.
2	Surface Water	01/08/2017	Internal flooding at Grasmere Grove due to insufficient pipe diameter of soakaways.
3	Surface Water	01/08/2017	Re-occurring flooding following heavy rainfall and blockage of pipes. Soakaways have been installed to resolve issue.
4	Surface Water	01/08/2017	Re-occurring road flooding following heavy rainfall.
5	Surface Water	01/08/2017	Re-occurring flooding following heavy rainfall. Gullies have since been cleaned.
6	Surface Water	01/08/2017	Road flooding within both carriageways following heavy rainfall due to Southern Water pumping station issues.
7	Surface Water	01/08/2017	External flooding in garden areas due to surcharged manholes following heavy rainfall.
8	Surface Water	11/06/2016	Road flooding, partially affecting property at Canadian Avenue.
9	Surface Water	17/06/2016	Road flooding and external areas of property at Swaine Close flooded. Works having been undertaken to drainage system.
10	Surface Water	17/06/2016	Re-occurring road and internal flooding at Grasmere Grove due to inadequate soakaway. Soakaways have since been updated.
11	Surface Water	17/06/2016	Internal flooding to hallway at Redwing Road. New soakaway installed.
12	Surface Water	17/06/2016	External flooding to rear of property at Lodge Hill Lane due to surcharged gully.
13	Surface Water	17/06/2016	External flooding in garden and patio area at Grasmere Grove.
14	Surface Water	17/06/2016	Surface water flooding.
15	Surface Water	17/06/2016	Surface water flooding.

40	Unknown	21/09/2015	Please contact Medway Council for further information.
41	Surface Water	01/01/2014	External flooding at properties following heavy rainfall. Soakaways and gullies have since been installed.
42	Surface Water	02/01/2014	Highway flooding and external flooding at properties.
43	Surface Water	06/02/2014	Re-occurring flooding in garden area following heavy rainfall.
44	Surface Water	24/08/2013	Road and internal flooding following heavy rainfall. Water flows between the properties and into the gardens. Floodgates and gullies have been installed.
45	Surface Water	24/08/2013	Surface water flooding within Gillingham Road across railway crossing and surrounding area of track.

ID	Type of Flooding	Date Flooded	Description of Flooding
46	Surface Water	24/08/2013	Internal flooding following heavy rainfall.
47	Surface Water	24/08/2013	Flooding caused by accumulation of surface water runoff and exacerbated by inability to discharge into ordinary watercourse located at rear of properties at Merry Boys Road. Nearby drainage ditch was poorly which added to issue.
48	River	24/12/2013	Internal flooding caused by ordinary watercourse due to poorly maintained channel.
49	River	24/08/2013	Flooding caused by ordinary watercourse.
50	Surface Water	18/09/2013	Re-occurring flooding of areas around railway level crossing and parts of pavement following heavy rainfall.
51	Sea	06/12/2013	Internal flooding possibly caused by water overtopping the river wall.
52	Sea	06/12/2013	External flooding of areas around and adjacent to Watermill Wharf, caused by a small breach in the flood defences at Watermill Wharf. Re-occurring flooding following heavy rainfall due to highway drainage and tide locking.
53	Sea	06/12/2013	Overtopping along Riverwalk.
54	Surface Water	06/12/2013	Surface water flooding due to tide locking causing internal flooding.
55	Surface Water	06/12/2013	Surface water flooding due to tide locking causing surface water flooding within basement areas.
56	Surface Water	06/12/2013	Surfacing water flooding within highways due to tide locking and failure of Southern Water pumping station.
57	Sea	06/12/2013	Possible leaking of flood defence embankment.
58	Surface Water	06/12/2013	Surface water flooding within highway due to tide locking.
59	River	24/12/2013	Internal flooding of properties and within garden areas.

ID	Type of Flooding	Date Flooded	Description of Flooding
60	River	24/12/2013	Highway flooding.
61	Surface Water	23/12/2013	Re-occurring external flooding of properties following heavy rainfall. Soakaways have been fitted and additional gullies have been installed.
62	Unknown	Winter of 2013 - 2014	Possible water-logging of fields.
63	Unknown	01/06/2000	Please contact Medway Council for further information.
64	Unknown	17/06/2003	Please contact Medway Council for further information.

70	Unknown		Please contact Medway Council for further information.
71	Unknown		Please contact Medway Council for further information.
72	Surface Water		Flooding following heavy rainfall due to drainage ditches and soakaways not being properly maintained.
73	Surface Water		Flooding following heavy rainfall due to faulty highways gullies.

ID	Type of Flooding	Date Flooded	Description of Flooding
74	Surface Water		Re-occurring flooding of large areas within carriageway following heavy rainfall due to the soakaways reaching capacity.
75	Surface Water		Re-occurring flooding of the airfield following heavy rainfall. Airfield floods on a regular basis due to the areas of lower and upper stoke draining via the land drainage ditches to the seawall within the boundary of the airfield and is then restricted from passing through the seawall due to an undersized pipe.
76	Surface Water		Flooding following heavy rainfall due to poorly maintained soakaways. New soakaways have now been installed.
77	Surface Water		Flooding following heavy rainfall due to poorly maintained soakaways which reach full capacity during heavy rainfall.
78	Surface Water	Winter months	Road flooding. There is no positive highway drainage system at the locations of the flooding.
79	Surface Water	Winter months	Surface water flooding from surrounding farmland.
80	Surface Water	Winter months and summer rainstorms	Surface water flooding within road following heavy rainfall as a result of soakaway system surcharging and being poorly maintained.
81	Surface Water	Winter months	Flooding following heavy rainfall as a result of soakaway system surcharging and being poorly maintained.
82	Surface Water	Winter months	Road flooding following heavy rainfall as a result of poorly maintained highway gullies.
83	Surface Water	Winter months	Surface water flooding, possibly due to poorly maintained highway drainage ditches.
84	Surface Water	Winter months	Surface water flooding due to poorly maintained drainage ditch.
85	Surface Water	Winter months	Surface water flooding due to poorly maintained drainage ditches.
86	Surface Water	Winter months	Surface water flooding due to poorly maintained highway and land drainage ditches.

ID	Type of Flooding	Date Flooded	Description of Flooding
87	Surface Water	Winter months and summer rainstorms	Surface water flooding caused by water flowing from surrounding farmland onto carriageway, possibly due to poorly maintained land drainage ditches.
88	Surface Water	Winter months and summer rainstorms	Surface water flooding due to urban and rural land drainage ditches being unable to discharge freely into Yantlett Creek and Thames Estuary.
89	Surface Water	Winter months and summer rainstorms	Surface water flooding within road due to Southern Water's pipe network exceeding storage capacity.
90	Surface Water	Winter months and summer rainstorms	Surface water flooding due to urban and rural land drainage ditches being unable to discharge freely into Yantlett Creek and Thames Estuary.
91	Surface Water	Winter months and summer rainstorms	Road flooding following heavy rainfall due to Highway Lagoon being poorly maintained.
92	Surface Water	Winter months and summer rainstorms	Surface water flooding due to urban and rural land drainage ditches being unable to discharge freely into Yantlett Creek and Thames Estuary.
93	Surface Water	Winter months and summer rainstorms	Surface water flooding due to urban and rural land drainage ditches being unable to discharge freely into Yantlett Creek and Thames Estuary.
94	Surface Water	Winter months and summer rainstorms	Surface water flooding due to urban and rural land drainage ditches being unable to discharge freely into Yantlett Creek and Thames Estuary.
95	Surface Water		Flooding following heavy rainfall as a result of water not being contained on farmland.

ID	Type of Flooding	Date Flooded	Description of Flooding
96	Sea	Summer of 2010	Flooding caused by collapsed headwall opposite the Medway Tunnel which allowed tidal water to flow back up the Whitewall Stream.
