

### **Physiotherapy briefing note**

The local bus company Arriva have been approached and a meeting arranged to discuss the possibility of the relocation of the bus stop. Patients currently attending the physiotherapy clinic at Medway Hospital are being surveyed to determine the number of patients who travel by, car, taxi or public transport. This will help us identify the approximate percentage of patients who may have to walk from the bus stop.

The exact measurement between the bus stop and Chambros House is also being measured, and proposals to allow access to the site by the quickest route being developed.

A full report will be available to be submitted to the committee as soon as possible.

Regards
